

TEKS-tivity

TEKS-tivity Book

TEKS-tivity books are designed to provide hands-on TEKS activities and additional practice problems to step up to a whole new level of differentiated learning!

Every TEKS-tivity includes a Reflection Page or a Summary of Learning for the activity. This student reflection reinforces learning to ensure that students are making meaningful connections with the concepts. This process leads students through the steps of true mathematical fluency. A Unit Assessment is provided at the end of each unit in order to aid in tying the activities to learning. This deepens the students' understanding of underlying mathematical concepts.

The teaching notes include facilitating questions to accompany each of the activities as well as the directions for the activities. It is important to use the questions to lead the discussions during and after the activity to help students process meaningful learning.

Multiple engaging activities are provided for every lesson.

Journaling and a Vocabulary Activity are included to enhance an in-depth understanding of each concept.

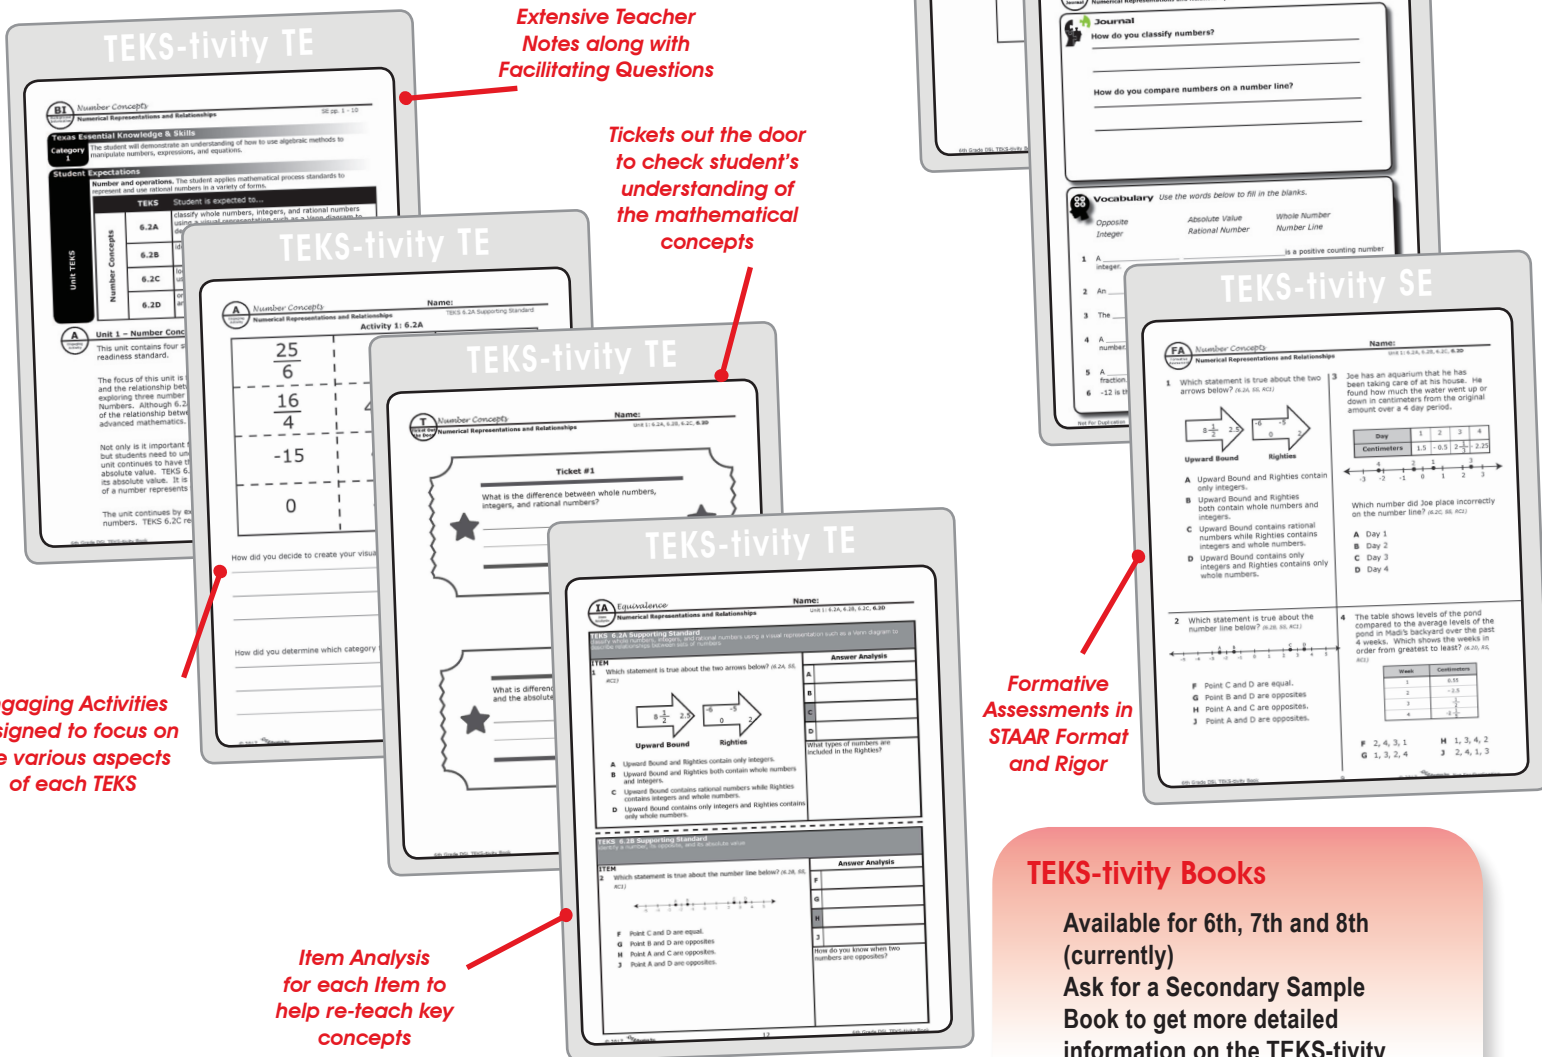

Extensive Teacher Notes along with Facilitating Questions

Tickets out the door to check student's understanding of the mathematical concepts

Formative Assessments in STAAR Format and Rigor

Engaging Activities designed to focus on the various aspects of each TEKS

Item Analysis for each Item to help re-teach key concepts
